

“Practical Chiral Chromatography – a User’s Perspective” breakfast seminar

This short seminar is intended as an introduction to those scientists who are involved in chiral chromatography and want to use the technique to assist in their analysis. Specifically aimed at end users in the field, this seminar will give an understanding of the processes involved and the current approaches to chiral analysis conducted in industry. Written from an end-users perspective, this course is ideal for those chromatographers involved in practical chiral method development and those who want to develop more robust methodology that is fit for purpose.

Date	Location	Trainer	Cost
Wednesday 27 th July	Trinity Centre, Cambridge	Dr. Brian Montgomery	£25
Wednesday 28 th September	Oxford Science Park, Oxford	Dr. Brian Montgomery	£25
Wednesday 26 th October	York Science Park, York	Dr. Brian Montgomery	£25
Wednesday 23 rd November	Radisson Blu Hotel, Manchester Airport	Dr. Brian Montgomery	£25

The above course fees are exclusive of VAT and must be paid prior to commencement of the course dates. Course costs include breakfast, all refreshments and course notes. Discounts may be available for multiple bookings - please enquire.

The Timings

7.30am – Registration, breakfast, tea & coffee
8.00am - Main seminar start
9.30am - Main seminar close
Open Q&A session & exhibition follows

The Course Agenda

A number of topics will be covered during this seminar:

- Importance of separating chiral molecules
- Chiral recognition processes
- Chiral interaction mechanisms
- Chiral analysis
- LC vs SFC
- Method development approaches in industry
- Chiral column screening strategies
- Preparative scale up
- Real-Life pharmaceutical applications
- Troubleshooting

The main seminar will close at 9.30am and delegates are invited to stay on for an open Q&A session & exhibition.

The Trainer

These courses represent a valuable opportunity to develop and improve your chiral chromatography skills, with one of Europe’s leading chiral experts. Dr. Brian Montgomery has almost 2 decades of experience working in Pharma R&D, with extensive practical knowledge of chiral chromatographic method development. He has been responsible for the introduction, development and application of chiral LC and chiral SFC technology working in early Drug Discovery, led a Purification team concentrating on chiral LC/SFC applications and been training scientists in the skills necessary for chiral chromatography at both analytical and preparative levels for many years.

Your Guarantee: We are confident that the techniques you will hear about on these courses will provide you with many ideas for improving efficiency in the laboratory – in fact we guarantee it! If after six months you have not been able to recover the registration fees by applying what you have learnt from the course we will happily **refund your money**.

Special offer – book on this valuable course for FREE: Purchase any chiral HPLC column from Hichrom and qualify for a free place on this course. Please quote our promotional reference HI01-11A-CH

To book on this course, please complete the fax-back registration form overleaf or contact us on:- Tel: 0118 930 3660 or seminars@hichrom.co.uk
